

Index 60mm Track MV Adjustable 100mm Wall Wash

PRODUCT DESCRIPTION

A wall washer with restrained proportions and a clean aesthetic. Used to create even illumination from floor to ceiling and across a wall, the effect reinforces length and height of the wall as a whole. Wall washing is ideal for the lighting of artwork, feature walls with materials such as stone, or spaces with high ceilings. The fixture is semi-recessed, with fixing springs holding the mounting plate within the ceiling. Track mounting and controllable output allows the user to configure layouts easily, with scope to adapt to changing requirements such as galleries and museums.
